EMBARQ & CASABI PARTNER TO BRING FIRST 'SMART PHONE' TO THE HOME

EMBARQ™ eGo™, the next generation home phone powered by Casabi, now available to qualifying EMBARQ™ Home Phone customers

Campbell, CA - April 14, 2008 - EMBARQ (NYSE: EQ) and CASABI, INC., today announced their collective efforts to bring web-enabled features and services to home phones for the first time. The first product developed from these efforts, EMBARQ™ eGo™, is now available to qualifying EMBARQ™ Home Phone customers.

EMBARQ™ eGo™ is powered by Casabi's network-driven solution which sources, delivers and optimizes virtually any web-based service or content to capable, broadband-connected home phone screens. The EMBARQ™ eGo™ handset's color screen provides EMBARQ™ Home Phone customers with internet-like services, including visual voicemail, playable in any order; a network-based address book; yellow page search with click to call and save to address book features; and local content including current weather, horoscopes, sports scores, and news.

"The shared vision of EMBARQ and Casabi to apply innovations in technology and home communications is very exciting," said Dennis Huber, senior vice president of Corporate Strategy and Development for EMBARQ. "The EMBARQ™ eGo™ will provide EMBARQ™ customers with the reliability of the home phone combined with innovative features and instant access to information from the Internet.

Leveraging Casabi's unique architecture, the EMBARQ™ eGo™ is driven entirely from the network, enabling EMBARQ to add or enhance features and services at any time without user-initiated software upgrades or downloads.

"This project between EMBARQ and Casabi is directly in line with Casabi's mission to make connected home devices smarter while supporting the continued commitment of EMBARQ to enhance their customers' home phone experience," said Neville Street, chief executive officer of Casabi. "We're incredibly proud to have EMBARQ as a key customer and are looking forward to working together to develop future products for their customers."

In order to take advantage of all of the features of EMBARQ™ eGo™, EMBARQ™ customers must have qualifying EMBARQ™ Home Phone service, EMBARQ™ Voicemail and EMBARQ™ High-Speed Internet access. EMBARQ™ eGo™ home phone handsets are available at EMBARQ™ Stores or online at www.embarq.com/ego. More information about Casabi can be found at www.casabi.com

About Casabi

Casabi makes the home phone smarter, delivering web-based services and content to IP-connected devices. Casabi's device software and unique network architecture allows an expanding range of connected devices to integrate seamlessly with a myriad of carrier and web-based services including visual voice mail, network address book, yellow page search, ringtones and more. The Casabi solution enables carriers to differentiate their voices services, increase revenue, drive up customer retention and extend their brand throughout the home. We started with phones. Watch where we go next. For more information, visit www.casabi.com.
